

Guidelines for Contributors:

Follow the APA Formatting & referencing style for your research paper. Your essay should be typed, double spaced on standard sized Paper (8.5" x 11") with 1" margins on all sides. You should use a clear font that is highly readable. Al-Burz recommends using 12 pt. Times New Roman font. Include a page header (also known as the "running head") at the top of every page. To create a page header/running head, Insert page numbers flush right. Then type "TITLE OF YOUR PAPER" in the header flush left using all capital letters. The Running head is a shortened version of your paper's title and cannot exceed 50 characters including spacing and punctuation.

Major Paper Sections

Your essay should include four major sections:

- 1. Title page**
- 2. Abstract**
- 3. Main Body**
 - 3.i Introduction
 - 3.ii Method
 - 3.iii Results
 - 3.iv Discussion
- 4. References**
 - 4.i Appendices(if necessary)
 - 4.ii Tables and/or figures (if necessary)

Why the topic is important (covered in your introduction)

What the problem is (also covered in your introduction)

What you did to try to solve the problem (covered in your methods section)

What you found (covered in your results section)

What you think your findings mean (covered in your discussion section)

Thus an experimental report typically includes the following sections.

Title Page

The title page should contain the title of the paper, the author's name, and the institutional affiliation. Include the page header (described above) flush left with the page number flush right at the top of the page. Please note that on the title page,

Your page header/running head should look like this:

Running head: TITLE OF YOUR PAPER

Pages after the title page should have a running head that looks like this:

TITLE OF YOUR PAPER

Type your title in upper and lowercase letters entered in the upper half of the page. APA recommends that your title be no more than 12 words in length and that it should not contain abbreviations or words that serve no purpose. Your title may take up one or two lines. All text on the title page, and throughout your paper, should be double spaced.

Beneath the title, type the author's name: first name, middle initial(s), and last name. Do not use titles (Dr.) or degrees (PhD).

Beneath the author's name, type the institutional affiliation, which should indicate the location where the author(s) conducted

Abstract

Begin a new page. Your abstract page should already include the page header (described above). On the first line of the abstract page, center the word "Abstract" (no bold, formatting, italics, underlining, or quotation marks). Beginning with the next line, write a concise summary of the key points of your research. (Do not indent.) Your abstract should contain at least your research topic, research questions, participants, methods, results, data analysis, and conclusions. You may also include possible implications of your research and future work you see connected with your findings. Your abstract should be a single paragraph double spaced. Your abstract should be between 150 and 250 words. You may also want to list keywords from your paper in your abstract. To do this, indent as you would if you were starting a new Paragraph, type *Keywords:* (italicized), and then list your keywords. Listing your keywords will help researchers find your work in databases.

Angeli, E., Wagner, J., Lawrick, E., Moore, K., Anderson, M., Soderlund, L., & Brizee, A. (2010, May 5). *General format*.
